ADVANCED SOLUTIONS

BRANDS

Honeywell Trend BMS

Your Global Partner since 1982 for energy management within your buildings - Trend Building Energy Management Systems (BEMS) help reduce energy waste and costs while still maintaining occupant comfort. When building systems are integrated, each one operates more efficiently and more effectively. You gain a clearer view of what's happening today so you can manage for tomorrow, that's simply intelligent.

Some industries that we've helped become more efficient, compliant and sustainable are healthcare, education, data centers, commercial buildings, telecommunication, pharmaceuticals, hospitality and transportation.

Inncom by Honeywell

Honeywell's world-class R&D and Engineering teams work hard to bring you a broad range of innovative, intelligent devices and dependable, integrated systems. These are combined in various ways to provide solutions for energy management, on-line electronic lock control, guest interfaces and operating enhancements for engineering, housekeeping, security, and other hotel staff groups. INNCOM system integration has proven to be among the most reliable, cost effective and technologically advanced, room automation systems in the world for over 35 years.

We handle Guest Management systems for standalone villas, apartments, and hotel properties.

Blaxtair

Blaxtair is a smart sensor that uses artificial intelligence to differentiate between pedestrians and objects, helping to keep people safe, who work in close proximity to such equipment. This pedestrian detection system for mobile plant and forklift trucks makes use of Industry 4.0 technology (machine learning, complex algorithms and intelligent sensors).

AVE Automation

Home automation, anti-intrusion and video intercom with AVE DOMINA Smart become one. A single large integrated system for the new generation smart home. A system full of opportunities with infinite automation possibilities, conformable to every need, with remote controls and voice commands.

AVE includes maximum protection, cloud app connected to your lifestyle, voice commands, anti-intrusion with smart IoT central unit and video intercom system. It is a one-stop solution to make your home smart.

Honeywell Electronic Air Cleaners

Air Cleaners are a more advanced or complete solution than standard replacement furnace filters. Air Cleaners work efficiently to capture more airborne particles from the air passing through the filter and requires minimal maintenance while doing so. No replacement filters needed. Achieving cleaner air has never been easier.

Process Measurement & Control (PMC):

Comprehensive portfolio of products and software to increase accuracy, efficiency, and reliability.

- Field Instrumentation
- Gas Measurement
- Terminal Operations
- Scalable Control Solutions

LANDMARK PROJECTS
